Witness.

Spring 1967 (Don will know date)

Coming out of Stratford, 4 mi E of Stratford,

Barry E to Barnwell. Time 10:30 P.M.

Don Dodge Phoenix, 1965. White, Mercury, with tin-

fruit seat as other - like object, like a work lamp

light. Over edge. Returning to well. Ball got up to top of hill & disappeared.

Reappeared at high angle, to east, near top of mountain.

Following car along, 200 yds above car. I saw enormous hills a house. Faint orange luminosity on bottom.

Let up roadway. Then became very bright & vanished & reappeared a mile away & over no hills, to right. Again small & was

this in 10 seconds (leaf & trail). The game back down car again. Rays very slow.

Delid clear of Barnwell, 60-80 feet at least, &

60-80' d. 200 yds up. Radio antenna.

low. Correct obj to 75° zenith angle. Probably within 1000.

Had to turn the top, down. Encrypted.

Ahead 80 yds. Second time got 115 yds & it

stays for mile. From the hill Deloris Park (perhaps 18 mi of Barnwell). Suddenly got very bright & vanished. Car also see it at all the

Reappears over car. The got to Barnwell side of the Lindeman Tunnel &

reappeared again on ~~the~~ car, some light stays with car & 3 miles this side of Barnwell's Graham Tunnel. Got to tunnel light, vanished & was 4/5 to 1 mile again & lower. Did not see it at all. They passed on it stopped this. That was the end.

No engine heard. Tank graham. But see it above

from 90 to 50, it went ahead of it until back of the object above 4 km. Then it slowed to 50 mph. But soon reappeared at 90 mph.

No sound outside the engine. No flames. No photographs

At one point  
● he  
broke it  
if over-act.

Shyne ft.  
above at  
80-115 mph  
gets v. bright  
● Vanishes.

effects.

Not a car, all the way. There never seen that happen.  
Her drive thru transporter not, & never seen this happen.

It was gone each time they wait then small particles  
come.

See in hotel's  
several parts  
deposits  
when

B. B. B. B.

Got home at 10:45; as drive to Boulder airport  
& asked airport who had been exp. - stating in that area. Nothing  
seen anything. That's him so ask that they better see it.  
We'll try get to Boulder, they'll be early there.  
& that's see it. They saw the Denver only in that  
Could see front gate & was on other side not in  
front daylight.

There saw anything like it before.

Ken's Corvair saw an object like it & go out

along. Robert Bussard told him someone during calls  
now consider object.

(Mild observation)

When pulled up at Lincoln <sup>5 TRUCKS</sup> Stewart, father & Louis  
he came out & saw <sup>object</sup> it, it's in station, morning - but is  
probably an aircraft, though some say color.

With object still there it. He too frightened to walk  
in night Boulder. He only saw it mistaken & he  
stopped car & get out.

When ready to  
approach bar  
obj always  
brightened  
up for 3-5  
seconds &  
then faded  
overhead.

Before it came back, it dump brightest up, in some  
of 3 seconds, & then suddenly came to him. Right the  
other than, but more smaller than mine.

Next to police. No one there then. No report to RAAF  
Tall fences next day & all said was a theory report.

Robert Buss - check. Best guess reported by him.
