

1969: Baralaba, Qld

CE1

Multi-witnessed

7-25-1969. Baralaba, Australia. MAN FOLLOWED BY "VISITORS"

Early in the morning, Mr. Adrian Reimer, a baker, was driving between Biloela and Baralaba when he saw "this bright light in a paddock." He stopped to get a better view and described it as "an upturned tortoise shell."

There were portholes in the side and a mast on top. It emitted a strange humming sound as colored lights flashed around it and now and then a light would flash on in the trees. The "shell" was moving along in a jerking motion, going close to the ground then lifting up again.

As Mr. Reimer sat fascinated, a second "shell" seemed to come from behind the trees. "I was a bit frightened and drove to a property a few miles down the road, followed all the way by a third one that had approached to join the others," he said.

Mr. Reimer's parents and Mr. John Major saw the objects when he arrived home and observed them through binoculars for over two hours. Mr. Major said that one seemed to be the mother ship and glowed with a constant yellow light, while the other two were changing colors rhythmically. (Brisbane Sunday Mail) (Cr: U.F.O.I.C.
