Belgium, Herentals, 1-2-1979

To Center for UFO Studies Dokter Allan Himek.

Dear Dokter Himek.

In January 1979 (12 January 1979) 9 h.P.M. 15 or 20 oval disks (UFO's) fly over my observation position, altitude 50-100 meters of the ground. Colour rose-red and with a high speed and in V formation. They came from the east and fly over to the Nordwest. The sound of these objects is like a light or soft generator or turbine.
Many UFO's are seen in Belgium near Antwerp, those days (December 1978 January 1979).
Can you tell me what UFO's proposed? Can you give me some information about UFO?

With my compliments

Willy De Groof astronomer

Member of the Belgian astronomer Association
