

1981: Ayr, N. QNSLD

Dear Sir,

U.F.O. SIGHTING 7-45pm. 28-10-1980.

14-1-1981.

Since 1967, I have been a firm believer in U.F.O.s. That is when I saw my first U.F.O., since then I have been out in the yard at night watching for whatever moved. I have since bought myself a 12 volt spotlight to signal with if I saw anything unusual.

The following is that which I saw one evening along with my 13 year old son Stephen. If possible we would like your opinion of what we saw. I have already sent this statement through to U.F.O. Research Queensland and after reading your book "THE U.F.O. EXPERIENCE" decided to contact you.

At the above time I went out to the rear of my house in Ayr, Nth Qld. There I saw a pulsating red light, as big as a golf ball, in the sky above me. It was travelling N.W. to S.E., at first I thought it was a plane. Then I realised that it wasn't a plane because there was no sound or flashing white light with this object, also it was moving too slow.

I connected up my spotlight and flashed it in the direction of the light. My spotlight is 12 volt, it is connected to a 15 volt intermittent electric train transformer run from the mains supply. In having the spotlight set up this way after ten seconds it goes on off-on off and keeps going like this until the switch on the back is turned off.

The red light continued travelling very slowly across the sky then went out. Using the switch on the back of the spotlight I flashed the place where the light went out, with three quick flashes, the red light pulsated three times in answer to my signal. I did this four times and each time it flashed back, then it returned to its original pattern moving slowly to the South East. When it had moved some distance it did a ninety degree turn and headed East.

After a few minutes the light went out again, all this time I had the spotlight pointed in its direction. I immediately repeated the same procedure as before and obtained the same result. This time the object only answered me three times then would not answer me any more. Thinking it may return I kept watching the spot where it disappeared, then, way over to the right of this spot I was watching, it reappeared, stationary and pulsating. I immediately positioned the spotlight in its direction and in doing so it moved off in an Easterly direction very slowly. I continued to flash this object until it went out of sight behind some houses. The time duration for all of this to take place was 45 minutes.

My 13 year old son is a witness to all of this taking place. Below is a sketch of the sighting and the way it was travelling.

HERE WITH SON.

WEST.

2.

I know of the time duration as I didn't go out side until after a T.V. show that I usualy watch. As for it lasting 45 minutes, the U.F.O. group I am with stress to take the time gap of anything unusual and make a note of the occurance right away which I did.

On three other occassions I have seen things that are unusual but this is the one I would really like answered as it has had me wondering since the night of it happening. There was no after effects whatsoever just anxiety as to what it was and ,I know this is going to sound stupid, but, did it really signal me? I know it did but it is still hard to believe that they did.

The other sightings only lasted about 30 seconds this one was 45 minutes.

Thanking You  
Yours Sincerely

*S. Rogers*
