April 2002 – Page 19

Followed by Strange UFO

by John C.

I am from northeast Georgia and this happened in June of 2000. It all began as my wife and I were driving home from work, both of us tired and sleepy, when we noticed a large, white light hovering just above the tree line. Back then we lived out in the country, and though it was rare to see aircraft flying around in our neck of the woods. We both excused the light as that of a helicopter. But that was not so. Only moments after viewing the "light," it began to move in a way that I can still not describe. The aircraft made quick diagonal cuts and began to spin in such a way that my wife and I had never seen. The craft followed us along the tree line, keeping up a steady pace and somehow maneuvering around the trees as to avoid crashing into them. It's safe to say that we were both afraid. As we continued to speed on, the one large, white light was joined by several other lights, forming a white, green, red and blue arrow. I am certain that the lights all belonged to the same craft. And as I watched, my wife concentrating the best she could on her driving, the "arrow" pointed skyward and shot off. It was the most amazing and odd thing I had ever witnessed, because as it shot off, trails of light were left standing in it's wake for at least three seconds, if not longer, until they vanished. To this day neither I or my wife has really spoken of this event, though the memory of that night has lingered in our minds for nearly two years now. I won't say that it was a UFO, but it was the closest thing to one I ever saw.
