

CEI: Silent multiwitnessed EGG with speed & maneuverability.

'It was real'

He was thrilled to speak with Knitz, 42, of Bloomdale, who contacted him because no one else seemed very interested in what she and others saw that Hallow-

een night. "She and the others saw something very extraordinary," he said. "I would love to know exactly what it was."

Knitz said she was making a delivery for Chuck's Pizza in Cygnet and had just gotten off the Cygnet exit of I-75. She looked right, toward a field, and saw something she will never forget.

"This black craft drifted over the trees," Knitz said. "It was sort of like an egg on its side with this weird blue-white glow at the back. It was about the size of three cars and had no wings, no wheels, no tail. It was perfectly silent. It was headed right over I-

75, not very high off the ground, and it just hung there."

"Then it pivoted about 30 degrees and there was a big burst of light from the back of it and it took off," she continued. "It was there one second, gone the next, leaving a trail of light across the sky."

Knitz said she delivered the pizza, then returned to the area, where she met Tim O'Neil, a classical piano teacher from Michigan. He and a friend were driving home from a Florida vacation. The UFO was still visible.

"It was not far from where I was before," she said. "The man

[O'Neil] pointed out over the woods and the thing was there, hovering above the trees. This time, it had orange and green lights on it. They said they tried to get closer to it, but when they did, their car started to lose power. They turned around and fled."

She said she was going to report the sight to police, but O'Neil did it first.

"Our bad luck was that it happened on Halloween," she said. "They thought it was just another crazy Halloween stunt. But it was not; it was real."

"People have told me it was a

blimp," she added. "I've seen plenty of blimps in my life, and they don't move like that. I wish I had a logical explanation. The shape and the way it moved really freaked me out."

Timmerman said he may never figure out what Knitz saw, but not for lack of trying. His wife, Margaretha, thinks he tries too hard.

"I want to enjoy our retirement, travel, and do things together," she said. "He's working harder now than he ever did."
