CE1

As we receive reports of sightings we will put them online as either anonymous or with contact information if the person reporting is OK with it.

Disclaimer: It would be next to impossible for us to research each sighting that will come in but it would also be interesting to see if a sighting might have been duplicated by other individuals at or near the same time and location. Keep this in mind as you read.

Southern Alabama - Small Translucent Vehicle

In the summer of 2007, in southern Alabama, around 9:00 PM central, I saw a small vehicle that appeared translucent... only light... yet had definite shape of a flying ship. It didn't seem to be solid, only light, but yet, so perfectly shaped, and clearly defined. It was very small, perhaps less than 10 inches long. I could clearly see it's shape: it's body was elongated, and it was crossed by a wing, similar in shape and dimension to an airplane. The outline of the figure glowed brighter than the whole of it, but it did glow, emitting light, all over. It was descending about the speed of a baseball, and only maybe 30 or 40 feet above the ground, heading toward the woods near me at about a 40* angle. I was about 30 feet from it. As it got perhaps 20 feet from the ground, the light was distinguished, and it was gone.

I tried to call someone I found online, but he was well not who I needed to confide in. Very hard to talk to him. I let it drop, but the memory has haunted me. I have often wondered what the purpose of such a small vessel might have been. It was certainly something.

Ashville - South
Bloomfield, Ohio
Pickaway County
March 2, 3, 2006
LOCAL

As I began my trip to Columbus, Ohio from my house in the Walnut Heights subdivision, I turned off of Cornstalk Ave onto Cromley Road heading north to Rt. 316. As I turned, I saw what appeared to be an airplane heading in a southerly direction and then turn to head west in my direction from the east. I lost track of it and didn't think much of it until I reached South Bloomfield and saw it there moving slowly in a northerly direction just west of Interstate Route 23. As I pulled into Speedway to get some gas, I saw it move slowly to the north of Speedway and then turn to the east and hover for a bit before going south again circling around Speedway...more info
