

Dr. Roach

MEMORANDUM

TO: UFO Investigating Group

FROM: Robert Low

SUBJECT: Allen Hynek's Proposed Σ C Classification System.

DATE: December 30, 1966

Attached is a copy of Allen's letter of December 8th (as well as a copy of my reply), in which he proposes a strangeness, credibility classification system. The scheme appears to have special usefulness for deciding at short notice whether or not a sighting should be investigated.

It was agreed at our meeting on December 27th that Dave Saunders would take a look at this problem. Hence, he might take an especially careful look at the Hynek proposition. It will also be very interesting to hear what he and the other psychologists have to say about the possibility of making meaningful numerical determinations of credibility.
