

SEPDT 7111
Wednesday Sept. 27, 1967 - about 5:15 pm

Telephone call from June Larsen, notes taken by id

In addition to the 2 possible landings of 9/5

odd substance, 9/9

activity out there seems to be picking up, although nothing in the papers. Dr. Levine of Colo. has told JL "if anything else happens out there, let us know at once."

JL has already notified Colorado, and Dept of Civil Defense, of the following:

long ltr about this, to DEK c/o G. Lore, is en route - this is one of several "hidden reports" coming to light

Monday ~~XXXX~~ Sept. 11, 1967 - between 1:30 and 2 p.m. CONFIDENTIAL

Practising woman psychologist of Pert Townsend, Wash.

her husband is asst. supt of a State correctional institution

with another woman (whose name & address JL has, plans to contact her)

were playing golf (on the course where one of the 9/5 landings had occurred)

when a huge, perfectly round metallic object ("larger than 2 large houses") was seen hovering over the area. It lazily crossed in front of the 2 witnesses and went off to the west with a wobbling motion. It seemed very low. There was no sound. No shadow seen, but there were many trees around. No other witnesses; but the only 2 other players that afternoon were on the other part of the U-shaped golf course.

Case brought to JL's attention by Sheriff of Jefferson County (also a CD official), who checked before he called JL. JL has talked to the psychologist, will talk to her companion. Woman psych. has already been annoyed by many kook calls, JL had trouble persuading her that NICAP was different.

Tell GL (in case it is not mentioned in ltr to DEK/GL) - that if JL is slow in sending reports, it's because she has been working steadily to copy, at CU's request, almost 3000 of her clippings. CU is paying for the material; Mr. L. bought JL a copying machine.

Also - pls tell JEM about the activity out there & JL's work - she has not been sending him what she wanted or even writing him a postcard.
